

Reducing Complex Coding

AI Powered Custom Software Development Platform

erp.formezy.com

Transform Your Business with Low-Code/No-Code ERP Software

What is Low-Code/No-Code ERP? Low-code/no-code ERP platforms enable users to create and modify enterprise applications through visual development tools, such as drag-and-drop interfaces and pre-built templates, rather than traditional coding. This democratizes the development process, empowering business users to take control of their workflows and solutions.

Benefits of Low-Code/No-Code Based ERP Software

Rapid Application Development

Enables organizations to build applications quickly without extensive programming knowledge, significantly reducing time-to-market for new solutions.

User Empowerment

Allows non-technical users to design and customize applications, fostering innovation and enabling business users to contribute directly to their workflows.

Improved Collaboration

Facilitates better collaboration among departments by providing tools that enable real-time updates and insights, thereby increasing overall efficiency.

Seamless Integrations

Supports easy integration with existing systems (like Excel, CRM, and other enterprise applications), ensuring smooth data flow and consistency across operations.

Real-Time Data and Analytics

Offers dashboards and reporting tools that provide real-time insights into business performance, aiding in informed decision-making.

Low Training Requirement

Intuitive interfaces and drag-and-drop functionality lower the learning curve, enabling employees to navigate and utilize the system with minimal training.

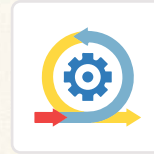

Cost Efficiency

Reduces the need for specialized development teams, lowering labor costs and minimizing expenses associated with traditional software development.

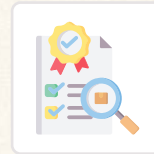

Flexibility and Scalability

Easily adapt and scale applications to meet changing business requirements, accommodating growth without the need for complex architecture changes.

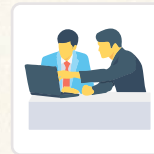

Enhanced Agility

Provides the ability to quickly respond to market changes and business needs, ensuring organizations can remain competitive in a fast-paced environment.

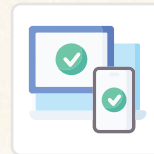

Quality Control and Compliance

Built-in compliance features and automated testing help maintain quality control and ensure adherence to industry regulations and standards.

Reduced IT Burden

Frees up IT resources from routine development tasks, allowing them to focus on strategic projects and higher-value activities.

Community and Marketplace Access

Our low-code/no-code platforms have active user communities and marketplaces for templates and modules, which can accelerate development and enhancement.

Real-World Example: Adding an Unloading Material Entry Module

Imagine a construction supply company that has successfully implemented our ERP system to manage its sales and invoicing processes. Recently, the management identified a critical need: to streamline the unloading of materials at customer sites. They want to track the unloading process to enhance accountability and improve customer service.

Benefits of Our Low-Code/No-Code Based ERP Software

	User Chat Facility		Leaderboard Announcement		Gamification with Badges		Calendar Notes
	Task Management		Import from Excel, Google Sheets		Interactive Graphs		Favorites / Bookmark
	Location Tracking		Export to Excel, PDF, JSON & CSV		Audit Trail Log		Document Attachment
	Drag & Drop Customization		OTP - Two Factor Authentication		WhatsApp Alerts		Centralized File Manager
	Dark & Light Mode		Email Inbox & Outbox		Native Mobile App		White / Private Label Facility

The screenshot displays the Formezy CRM dashboard interface. At the top, there's a header bar with the company name "Formezy" and its logo, followed by navigation links for "Dashboards", "Transactions", "Production", "Purchase", and "CRM". The main content area is divided into several sections:

- TRANSACTIONS**: This section includes cards for "Lead", "Inquiry", "Quotation", and "Sales Order". Each card shows the number of "Entries" and "Pendings". For example, "Lead" has 62 entries and 0 pendings.
- PRODUCTION**: This section includes cards for "Material Planning", "Production Order", and "Wizard". "Material Planning" shows 23 entries and 2 pendings.
- PURCHASE**: This section includes cards for "Indent", "Purchase Inquiry", "Purchase Quotation", and "Purchase Order". "Purchase Inquiry" shows 10 entries and 41 pendings.
- CRM**: This section includes cards for "CRN", "Purchase Bill Booking", "Purchase Return", and "Barcode Generator". "CRN" shows 34 entries and 6 pendings.

On the left side, there are additional navigation options under categories like "APPS" (Email, Chat, Todo, Calendar) and "UTILITIES" (Files, Gallery, Fast Edit, Other tools). The bottom of the dashboard features a "COMPANION" section with links to "My Business" and "Category".
